Comments -	A	• Thank you for your time and effort throughout the course! • No question listed... • N/A • N/A • Thank you. • Thank you for taking over for the class last minute! The experience was wonderful! • thank your • Thank you for the help with the retrospective. • I have nothing against Senanu she did a good job and was a great help
	B	• Dr. Sena has vast knowledge of this course and was able to communicate effectively for our understanding. She's always willing to assist with any question. • Professor Sena made some decisions about a couple class meeting sessions without consulting her colleague. Many of us students have noticed that. I do not know how Professor felt, but his body language tells us that maybe Sena should discuss this before such decisions. The last day of class, a student asked if Sena was coming in person, but Scott did not know whether she was coming to campus or joining the class remotely. Students can grow skeptical about the learning material whenever we notice a disconnect between professors. It is a learning process for everyone, professor and students alike. Students understood that there was a lot things to figure out since we had a late of the course. Thank you for guidance and encouragement! • I would not have been so successful in this class without the wonderful help from Professor Stone. He was awesome in helping explain things, go over assignments, and give feedback and even on his own time outside of class. Thank you, Professor Stone! I was disappointed in 2 of my team members for their lack of participation in our group assignment but was thankful for my other partner. If I were to give one suggestion for this class, I would say to have a more controlled environment when students are doing their presentations. We had other students talking and their phone going off during the entire class I felt very disrespected and distracted by their behavior especially in a master's program, our professors should not have to be babysitters to these students that lack respect for others. • This course was a complete mess from start to finish. First it started late and when it started, it had two instructors who had absolutely had no idea about what direction to take the course in. The whole content was copy pasted from a different teacher who taught the course previously. They didn't even bother changing dates. On top of that, they didn't bother reading that copy pasted content themselves.SO they were no help in queries regarding the work. Assignments were added randomly, virtual classes were scheduled on a whim without prior notice. One week lecture would be about something basic, next lecture they would jump to a topic 10 chapters advance. And then third lecture they would be back to repeating the same basic stuff again. There were a total of may be 2 concepts taught during the whole semester. Instead of using D2L as the main channel, they created a MS Teams alternate channels and students had to keep tabs of two systems creating confusion. It was a complete waste of money and time and students learnt nothing new. The instructors completely lacked the knowledge and skills to conduct a graduate level class. This course does not deserve to be a graduate level course. It is more appropriate for undergrad students who are just learning basic excel to present data. Complete waste of money and time for both students and teachers. Overall C- for the way course was conducted.
