- I always appreciate Dr. Lebens' curriculum so I'm glad Senanu uses it! There was one small hiccup in an assignment that posted incorrectly. I had a few weeks to redo the assignment, and Senanu was more than patient with my panicked emails about it. It was frustrating to need to redo an assignment I didnt know I was doing wrong, but how kind she was about it made it fine. Overall great last and great instructor!
- Answered in a timely manner and was able to help out when there was an issue
- I love her as a professor, she's straughtforward, easy to understand doesn't complicate stuff, she's super detailed and organized everything well and gives great feedback. She genuinely wants us all to do well in school.
- Thank you for a great course Professor Okuboyejo
- It seems like this course was ran in a lazy manner. Way too many assignment instructions were outdated and I had to figure out some things on my own, well outside of the resources provided by this course. Also, the instructor basically just posted material, which, as previously mentioned, wasn't always up to date, and graded our assignments with minimal feedback. Overall not impressed with the course and how it was instructed.
- the class was awesome. I got to know a lot of concepts in terms of business intelligence and analytics, which i can use at my work or in my future business.

- I was really looking forward to this course and was disappointed to find that most of it was run with AI content. There appeared to be really little effort given on the instructor's side. I do empathize that the class was not particularly engaging as it had really low attendance, but it felt like for those who did show up, we were really just being read slides that were created using AI and often had misleading or wrong images with the text. The disclosure of AI only really came after a complaint and after she had emailed all students about low participating and AI usage without disclosure. While I did not struggle much in this class because I have some experience in this field, I found my group members were really struggling because when they got points marked down and tried to get assistance they were told to reread the project instructions. that's a very discouraging way to learn and I can understand the lack of desire to continue trying in the course. I do appreciate that while we had a semester long project, she did give us some weeks off from lectures so we could spend the time with our groups, making scheduling much easier. the course was supposed to be 3 hours every Wednesday, but we ended up being dismissed early every class (after about 1.5-2 hours) and the course itself last met on November 19th. It overall felt like she was really over this class and course and so the students who did show up ended up not really getting the full benefits of the class. The instructor herself is a nice person and I was happy to hear her reminding us to be confident in our analysis and not soften our recommendations! It just feels like she was leaning a lot on AI this semester and perhaps due to the low attendance and effort of other students, checked out a lot.

- Best Professor
- Thank you for an amazing semester. You're a phenomenal teacher.
- I really appreciate Professor Okuboyejo for being patient with us and extending deadlines.
- Sena was an excellent professor and taught at a high level, but in an easy-to-interpret and understandable way. She was willing to answer all questions and made sure to ask us if we had questions at the end of each lecture, and was more willing to stay and teach us. Highly recommend the class to anyone interested in BI.

- Sena is inspirational and genuine in the way she offers support. She responds quickly, understands the effort you put in, and is fair.
- Great Course. Thank you
- Thank you Senanu Okuboyejo
- The class was educative and informative as I am in a position to apply what I have learned in this class in real situations.

- This was a challenging course - but I'm grateful for the challenge! The professor was excellent and wonderfully helpful and engaging
- No comment.
- Senanu Okuboyejo is an excellent teacher. She treats all students equally and explains clearly the course concepts and assignments that are required for each module.
- The instructor clearly knows her field and has a talent for making challenging material accessible. The group project and conference poster were excellent ways to experience real teamwork and real-world project skills. I always enjoy learning from this instructor; she has a way of making statistics and data analysis feel less overwhelming for any learner. She is also a warm-hearted person who genuinely cares about her students' success.
- Professor Senanu Okuboyejo, was great at explaining complex material and helped relate theoretical concept into everyday life. I enjoyed learning from her. overall this class was transformative.
