Comments -

- I appreciate the quick responses from the professor and timely feedback on assignments.
- there was no engagement. she threw out some ideas but did not follow through, such as communicating via Teams and meeting on Teams with the class. Never happened throughout the entire course. This class is pretty much a self lead class like most online classes.
- I appreciate that this was intended to be a zero cost course, but I felt like some of the videos we were asked to watch were more for marketing purposes than educational purposes. I wish we would have spent less time on Pivot Tables, and more time working with and mastering SAC and Tableau than we did. With that in mind I also appreciate that some taking this course may not have had the level of experience with excel or pivot tables that I had prior to this course.
- Great course with immediate, practical benefit to my professional life. Very glad I took this course and I feel like I learned a lot.
- She is very helpful with course materials and she is willing to make sure that you are doing well if not she will offer to meet with students on Zoom to discuss the subject matter which amazes me, especially with an online course that does not meet in person. She amazing through
- Professor Okuboyejo was able to timely and fast respond and ensure students understood anything they didn't understand. I had questions early on for assignments and my grades and she immediately made time for me to share my screen and walk over what went wrong on the assignment and the miscommunication. She gave students an extension to turn in assignments and she is very caring and optimistic on student success and way of external outside factors prohibiting students from turning assignments in to extend the due date. Gave clear instructions and have announcements of assignments of that week and put students success on the line. The Best!
